 **dahua** Hanwha

HIKVISION

Honeywell

SAMSUNG

Blue Eye is a pioneer in camera agnostic proactive live monitoring.

For years, other companies within the Remote Video Monitoring (RVM) industry have required customers to purchase and install their line of branded hardware, even if an existing surveillance system is already in place.

What's the result?

Customers regularly pay upwards of \$10,000-\$15,000 to replace an otherwise perfectly operable existing system so they can be eligible for live monitoring services.

To add insult to injury, these brand-exclusive cameras are seldom compatible with other monitoring service providers.

Why?

It generates significant revenue for companies and results in exorbitant switching costs for the customer, making it difficult for them to take their business elsewhere.

At **Blue Eye**, we recognize there are many different high quality cameras available in the market and we give our customers the autonomy to use whichever make and model they want to use.

We've worked diligently to ensure our live monitoring platform is compatible with many different brands, either natively or through integration.

Natively Compatible Brands:

- Astel
- Avigilon
- Axis
- Clinton
- Digital Watchdog
- ENS
- EZDVR
- Flir
- Hanwha
- Honeywell
- Lorex
- Magic
- Rifatron
- Titanium
- TVT
- Ubiquiti
- Vicon
- Visualint

Brands Compatible through Integration:

- 3xLogic
- Alibi
- Bosch
- Dahua
- Geovision
- Hikvision
- i-Pro
- IC Realtime
- Interlogix
- LTS
- Milesight
- Mobotix
- Panasonic
- Samsung
- Sony
- Speco
- Tyco Illustra
- Vivotek

Don't see your camera's brand listed?

We may still be compatible.

Please reach out to sales@goblueeye.com to discuss.

Notes:

- Blue Eye is compatible with any camera that provides a RTSP stream.
- Blue Eye will verify compatibility prior to activating or billing for service.
- Blue Eye will never recommend a customer install a certain camera brand prior to ensuring it's compatible, either natively or through integration.
